Usage

Before use, carefully read the directions on the packaging and act accordingly.

Pre Treatment

The surface should be clean, dry and free of grease.
Remove loose old lacquer and rust and sand the surface.
Apply a layer of primer suitable for the surface. After drying, sand the base layer (grain 600).

Treatment

The surface should be clean, dry and free of grease. The can should have room temperature.
Best application temperature 15 to 25°C. Before use, shake the can for 2 minutes and spray a sample.
Distance to the surface to be treated approximately 25 to 30 centimeters.

Apply the product in several thin layers. Before applying the next layer, again shake the can.

After use, clean the valve (turn can upside down and press the nozzle for approximately 5 seconds).

The drying time depends on the ambient temperature, the humidity of the air and the thickness of the lacquer applied.
